# C O N T E N T S

<b>1</b>	<i>Introduction</i>	
	Welcome to Building Geodatabases	1-1
	Course objectives	1-2
	About the projects	1-3
	Day 1 course content	1-4
	Day 2 course content	1-5
	Day 3 course content	1-6
	Course materials	1-7
	Additional materials and resources	1-8
	ESRI Support Center	1-9
	ArcGIS: a complete GIS	1-10
	Logistics	1-11
	Introductions	1-12
	Exercise goals	1-13
<b>2</b>	<i>What is a geodatabase?</i>	
	What is a geodatabase?	2-1
	Learning objectives	2-2
	Defining the geodatabase	2-3
	Advantages of geodatabase	2-4
	Geodatabase elements	2-5
	Feature classes	2-6
	Feature datasets	2-7
	Relationship classes	2-8
	Geometric networks	2-9
	Geodatabase topology	2-10
	Geodatabase tables	2-11
	Rasters in the geodatabase	2-12
	Geodatabase behavior	2-13
	Geoprocessing	2-14
	Extending the geodatabase	2-15
	Exercise goals	2-16
	Lesson review	2-17
<b>3</b>	<i>Types of geodatabases</i>	
	Types of geodatabases	3-1
	Learning objectives	3-2
	ArcGIS Desktop geodatabases	3-4
	Geodatabases employing ArcSDE technology	3-5
	File geodatabase	3-6

Advantages of file geodatabase	3-7
File geodatabase storage	3-9
Storage requirements (uncompressed)	3-10
Compressed file geodatabase (read-only)	3-11
Compression	3-12
Compact vs. compression	3-13
Migrating to file geodatabases	3-14
Migration considerations	3-15
ArcGIS Desktop licensing	3-16
Instructor-led demo	3-17
Exercise goals	3-18
Lesson review	3-19
<b>4</b> <i>Geodatabase validation rules</i>	
Geodatabase validation rules	4-1
Learning objectives	4-2
Geodatabase behavior	4-3
Editing benefits	4-4
Instructor-led demo	4-5
Lesson review	4-6
<b>5</b> <i>Subtypes and domains</i>	
Subtypes and domains	5-1
Learning objectives	5-2
Subtypes	5-3
Advantages of subtypes	5-4
Is your data subtype compatible?	5-5
Adding and calculating integer fields	5-6
Using subtypes	5-7
Domains	5-8
Types of domains	5-9
Advantages of domains	5-10
Domain examples	5-11
Creating domains	5-12
Applying domains to fields	5-13
Modifying domains	5-14
Subtypes and domains	5-15
Applying domains to subtypes	5-16
Exercise goals	5-17
Lesson review	5-18
<b>6</b> <i>Relating spatial and attribute data</i>	
Relating spatial and attribute data	6-1

Learning objectives	6-2
ArcMap joins and relates	6-3
What is a relationship class?	6-4
Advantages of relationship classes	6-5
Important considerations	6-6
Choose origin and destination tables	6-7
Types of relationship classes	6-8
Simple versus composite relationships	6-9
Relationship class properties	6-10
Cardinality	6-11
Common fields	6-12
Relationship rules	6-13
Relationship rules	6-14
Methods of connecting tables	6-15
Using relationship classes in ArcMap	6-16
Exercise goals	6-17
Lesson review	6-18

## 7 *Editing using attribute validation rules*

Editing using attribute validation rules	7-1
Learning objectives	7-2
Editing using subtypes	7-3
Editing using range domains	7-4
Validating range domains	7-5
Editing using coded value domains	7-6
Editing with relationship classes	7-7
Editing records in a relationship class	7-8
Adding records to destination table	7-9
Editing tips and tricks	7-10
Exercise goals	7-11
Project wrap-up	7-12
Lesson review	7-13

## 8 *Geodatabase annotation*

Geodatabase annotation	8-1
Learning objectives	8-2
Labels and annotation	8-3
Annotation in ArcGIS	8-4
Geodatabase annotation	8-5
Feature-linked annotation	8-6
Creating annotation	8-7
Advantages of geodatabase annotation	8-8
Preparing labels for conversion	8-9
Reference scale	8-10

Creating annotation from labels in ArcMap	8-11
Annotation classes	8-12
Unplaced geodatabase annotation	8-13
Creating annotation feature classes	8-14
Importing annotation into the geodatabase	8-15
Editing annotation	8-16
Exercise goals	8-17
Lesson review	8-18

## 9 *Geodatabase topology*

Geodatabase topology	9-1
Learning objectives	9-2
Topology in maps	9-3
Topology in the geodatabase	9-4
Coincident geometry	9-5
Real-world examples	9-6
Geodatabase topology	9-7
Advantages of geodatabase topology	9-8
Topology considerations	9-9
Using the cluster tolerance	9-10
Ranks	9-11
Topology rules	9-12
Some commonly used topology rules	9-13
More commonly used topology rules	9-14
Dirty areas	9-15
Validating a topology	9-16
Topology errors	9-17
Managing errors	9-18
Displaying in ArcMap	9-19
Topology workflow	9-20
Map topology	9-21
Exercise goals	9-22
Lesson review	9-23

## 10 *Editing using geodatabase topology*

Editing using geodatabase topology	10-1
Learning objectives	10-2
Topology workflow	10-3
Geometric elements of a topology	10-4
Editing a topology	10-5
Editing coincident geometry	10-6
Moving topology nodes and edges	10-7
Using topology edit tasks	10-8
Creating polygons from lines in ArcMap	10-9

Converting feature classes	10-10
Fixing topology errors	10-11
Common error fixes	10-12
Special topology rule	10-13
Exercise goals	10-14
Lesson review	10-15

## 11 *Geometric networks*

Geometric networks	11-1
Learning objectives	11-2
Geometric networks	11-3
Storing a geometric network	11-4
Features with roles	11-5
Geometric networks in a geodatabase	11-6
Two views of a network	11-7
Edges and junctions	11-8
Simple junctions	11-9
Orphan junctions	11-10
Simple edge	11-11
Complex edge	11-12
Connectivity rules	11-13
Special fields	11-14
Network analysis	11-15
Flags and barriers	11-16
Exercise goals	11-17
Lesson review	11-18

## 12 *Creating geodatabase schemas*

Creating geodatabase schemas	12-1
Learning objectives	12-2
What is a schema?	12-3
Schema editing versus feature editing	12-4
Spatial reference properties	12-5
Spatial domains	12-6
Resolution	12-7
Tolerance	12-8
High-precision coordinates	12-9
Building a geodatabase schema	12-10
Building a schema with ArcCatalog	12-11
Building a schema by importing	12-12
XML data interchange	12-13
Exporting geodatabase schema to XML	12-14
XML data export overview	12-15
Building a schema with data models	12-16

Building a schema with geoprocessing framework	12-17
Field data types	12-18
Exercise goals	12-19
Lesson review	12-20
<b>13</b> <i>Loading data into a geodatabase</i>	
Loading data into a geodatabase	13-1
Learning objectives	13-2
Geodatabase data sources	13-3
Loading data	13-4
Importing data	13-5
Loading data	13-6
XML import options	13-7
Using copy/paste and drag/drop	13-8
Which vector loading method is best to:	13-9
Fundamentals of raster data	13-10
Raster bands	13-11
Loading raster data	13-12
Raster datasets	13-13
Raster catalogs	13-14
Raster attributes	13-15
Raster storage considerations	13-16
Raster pyramids	13-17
Exercise goals	13-18
Lesson review	13-19
<b>14</b> <i>Geodatabase workflow</i>	
Geodatabase workflow	14-1
Learning objectives	14-2
Geodatabase workflow	14-3
Project 14A – Work with geometric networks	14-4
Project 14B – Work with cadastral data	14-5
Exercise goals	14-6
Project wrap-up	14-7
Lesson review	14-8
<b>15</b> <i>Additional geodatabase elements</i>	
Additional geodatabase elements (optional)	15-1
Learning objectives	15-2
Dimensions	15-3
Linear referencing	15-4
Cartographic representations	15-5
Network datasets	15-6

Schematic datasets	15-7
Survey datasets	15-8
Terrain dataset	15-9
Lesson review	15-10

## 16 *Course conclusion*

Course conclusion	16-1
Course objectives	16-2
ESRI educational support	16-3
Where do you go from here?	16-4
Learning pathways	16-5
Course evaluation	16-6
Thank you for attending	16-7
